

other two biodegradable resin layers are selected from the group consisting of an aliphatic polyester resin, a cellulose ester, a polypeptide, a polyvinylalcohol, a polyamide, and a polyamide ester.

32. (amended) A biodegradable laminated film as claimed in claim 30 or 31, wherein said each of said other two biodegradable resin layers are composed of resins selected from the group consisting of a polylactic acid-based polyester, a polyglycol acid-based polyester, a succinic acid-1,4-butanediol polyester, a succinic acid-ethylene glycol polyester, a succinic acid/adipic acid-1,4-butanediol copolyester and an isocyanate modified polyester thereof.

33. (amended) A biodegradable laminated film as claimed in claim 30 or 31, wherein said polycaprolactone layer and said other two biodegradable resin layers are laminated by coextrusion.

34. (amended) A biodegradable laminated film as claimed in claims 30 or 31, wherein tear strength in said biodegradable laminated film is higher than that of a film of polycaprolactone or a film of either of said other two layers having the same thickness as the biodegradable laminated film.

35. (amended) A biodegradable film for agriculture which comprises a biodegradable laminated film as claimed in claim 30 or 31.
